Software Developers
Job Posting: CW20-013

ContainerWorld located in Richmond, British Columbia is a premier logistics provider for the beverage industry; privately owned company with approximately 430 employees throughout its three BC facilities. ContainerWorld also operates in Ontario and Nova Scotia.

ContainerWorld's Information Technology infrastructure consists of industry leading equipment and professionals. The core of our system utilizes an Oracle ERP application operating across our complete Cisco communications network with Dell EMC compute and storage, headquartered in our redundant and environmentally monitored data center. Leveraging these systems is our in-house team of I.T. professionals including software developers, database administrators, projects managers, business analysts and network engineers. ContainerWorld actively supports Lean Six Sigma concepts.

Job Title/Hours:
Software Developers Mondays to Fridays 8:30am to 4:30pm – Full Time

Position Overview:
Working independently, with some guidance from others as required, executing software development, systems and process analysis, and operational support to improve the overall accuracy and efficiency of the company operations. This includes multi-language programming, following quality assurance procedures, designing basic data models, technical writing, and customer/user communication.

Main Duties:
Write code for software development projects to improve operational accuracy and/or efficiency
- Adhere to specifications to ensure software performs as required
- Optimize code for system efficiency
- Organize code for support and comprehension
- Analyze and model specifications for modules or smaller projects

Execute quality assurance procedures for project-controlled development
- Execute unit testing on code
- Execute behavior test plans on modules
- Execute stress and parallel tests on systems

Write technical documents to improve system support and software resiliency
- Write system user manuals
- Write code documentation and commenting
- Track code changes
- Write requirements and specifications for modules or smaller projects

Communicate with customers and users to support the system procedures and accuracy
- Answer questions and provide training
- Perform privileged tasks
- Document and track system issues

Others:
Preferred Knowledge, Skills and Abilities:
- Bachelor Degree plus 4 to 6 years experience
- Strong experience Java, PL/SQL, HTML 4/5, and JavaScript is required
- Experience with Oracle Forms & Reports 6 is preferred
- Experience with Oracle databases is preferred
- Strong judgment is required to create alternatives outside of existing practices and/or policies to ensure the most effective system solution is in place
- Problem solving involves engaging in analytical thinking with an appreciation for strategic impact resulting from changing operational requirements
- Independent thinking and analysis are required to handle system development
- Good verbal and written communications skills are needed

ContainerWorld offers and attractive package which includes excellent benefits and competitive compensation. To apply for this position please email your resume and salary expectations to careers@containerworld.com. We thank all applicants for their interest; however, only those selected for an interview will be contacted.
